YASH MAHESHWARI

Senior Software Engineer | Full-Stack & Backend Architect | AI Engineer (LLMs, RAG, AI Agents) | Web Scraping
Ajmer, Rajasthan, India | Open to Remote | +91 8000553597 | yashajmera1203@gmail.com
Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Senior Software Engineer with 3.5+ years of experience architecting, building, and scaling production web platforms across InsurTech, e-commerce, EdTech, and real-time gaming. Deep expertise in backend engineering with PHP (Laravel), Node.js, and Python (FastAPI), RESTful API design, multi-tenant SaaS, role-based access control, and MySQL, and MongoDB data modeling. Builds AI-powered products with LLMs (OpenAI API, Ollama), LangChain, Retrieval-Augmented Generation (RAG), vector databases, and Model Context Protocol (MCP) agents, plus resilient web-scraping and workflow-automation pipelines using Playwright, Selenium, and BeautifulSoup. Delivered 50+ projects, eliminated up to 80% of manual data-entry work through automation, and improved API performance by 40% through query optimization, caching, and asynchronous processing.

CORE COMPETENCIES

Backend Architecture & System Design | RESTful API Design & Integration | Full-Stack Web Development | Multi-Tenant SaaS Architecture | Generative AI & Large Language Models | AI Agents & Multi-Agent Orchestration | Retrieval-Augmented Generation (RAG) | Prompt Engineering & LLM Evaluation | Web Scraping & Data Extraction | Workflow & Business Process Automation | Database Design & Query Optimization | Performance Optimization & Caching | CRM & Payment Gateway Integrations | Code Review & Engineering Best Practices

TECHNICAL SKILLS

- **Languages:** PHP 8, JavaScript (ES6+), TypeScript, Python 3, SQL, HTML5, CSS3
- **Backend & APIs:** Laravel, Node.js, Express.js, FastAPI, REST APIs, WebSockets (Socket.IO), AJAX, Laravel Queues & Scheduler, JWT, OAuth 2.0
- **AI & LLM Engineering:** OpenAI API, Ollama, LLMs (GPT-4o, Llama 3, Mistral), LangChain, AI Agents, Model Context Protocol (MCP), Prompt Engineering, Embeddings, Function Calling, Structured Outputs
- **Web Scraping & Automation:** Playwright, Selenium, BeautifulSoup, Requests/HTTPX, Pandas, Headless Browsers, Proxy Rotation, Cron & Task Scheduling
- **Databases & Vector Stores:** MySQL, PostgreSQL, MongoDB, Redis, ChromaDB, FAISS, Pinecone, pgvector

-
- **Frontend:** Tailwind CSS, Bootstrap, jQuery, Responsive & Accessible UI
-
- **DevOps & Tools:** Git, GitHub, GitHub Actions, Docker, Linux, Postman, Swagger/OpenAPI
-
- **Integrations:** Zoho CRM API, Payment Gateways (Razorpay, Stripe), Google reCAPTCHA v3, Laravel Excel (Bulk Import/Export), i18n/Localization
-

WORK EXPERIENCE

Software Engineer | D2i Technology
Full-stack product engineering for client platforms | India
Nov 2025 – June (Present)

- Own end-to-end delivery of 5+ concurrent client applications built on Laravel, Node.js, and React.js, from requirements and database design (MySQL, MongoDB) to API contracts, code review, and production deployment.
-
- Reduced average API response time by 40% by profiling slow endpoints, eliminating N+1 queries, adding composite indexes, and introducing Redis caching for read-heavy resources.
-
- Designed and shipped 25+ RESTful APIs and third-party integrations (CRM, payments, notifications) that automated manual business workflows, saving client operations teams 20+ hours per week.
-
- Raised React.js Lighthouse performance scores from ~60 to 90+ through code splitting, lazy loading, memoization, and asset optimization, increasing engagement on key dashboards.
-
- Instituted pull-request checklists, PSR-12/ESLint standards, and reusable service-layer patterns, reducing production defects by ~30% and accelerating onboarding of new developers.
-
- **Tech:** Laravel, PHP 8, Node.js, React.js, MySQL, MongoDB, Redis, REST APIs, Git
-

Software Engineer | Hub2Technologies
Real-time gaming and e-commerce products | India
Nov 2024 – Aug 2025

- Engineered a real-time live-match gaming platform using Laravel, Node.js, and WebSockets (Socket.IO), streaming sub-second score and odds updates to thousands of concurrent users during peak match windows.

- Integrated secure payment gateways with signature-verified webhooks, idempotent transaction handling, and automated reconciliation, achieving 99.9% payment-settlement accuracy.
-
- Hardened sign-up and checkout flows with Google reCAPTCHA v3, rate limiting, and server-side validation, cutting bot registrations and spam submissions by ~90%.
-
- Launched multi-language (i18n) support in 5+ languages across e-commerce and gaming products, enabling expansion into new regional markets.
-
- Built e-commerce modules (catalog, cart, checkout, order management, admin analytics) with optimized MySQL schemas and AJAX-driven UX.
-
- **Tech:** Laravel, PHP, Node.js, Socket.IO, AJAX, MySQL, Redis, Payment Gateways, reCAPTCHA v3
-

Software Engineer | Fyntune Solution Pvt. Ltd.
InsurTech | B2B insurance distribution platform | India
Nov 2022 – Jul 2024

- Built and maintained core insurance policy-lifecycle modules (Claims, Policy Renewals, Endorsements, Cancellations, and Bulk Import) on Laravel for a B2B platform serving insurance brokers and insurers.
-
- Architected a queue-driven bulk-import engine (Laravel Queues, chunked Excel/CSV parsing, row-level validation, downloadable error reports) processing 50,000+ policy records per batch and cutting client onboarding from days to under an hour.
-
- Designed secure REST APIs for insurer and partner integrations with token-based authentication, request validation, and audit logging to support compliance in a regulated financial domain.
-
- Automated renewal reminders and endorsement workflows with scheduled jobs and event-driven notifications, reducing manual follow-ups by ~70%.
-
- Optimized heavy reporting and claims queries through indexing and query refactoring, reducing report generation time by 60%; mentored 2 junior developers on Laravel best practices.
-
- **Tech:** Laravel, PHP, MySQL, REST APIs, Laravel Queues, Laravel Excel, Redis, Git
-

Junior Developer (PHP & JavaScript) | Concentics Solution
Web development | India
Jul 2022 – Sep 2022

- Designed and developed a responsive, SEO-optimized website for The Luxe Pushkar Hotel, modernizing UI/UX and the mobile experience to drive more direct booking inquiries.
-
- Developed features for an Employee Management System (attendance, leave, reporting) and an Online Exam Portal (timed tests, auto-grading, results) using PHP, MySQL, JavaScript, and AJAX.
-
- **Tech:** PHP, MySQL, JavaScript, jQuery, AJAX, Bootstrap
-

PROJECTS

Multi-Vendor E-Commerce Platform with Intelligent Bulk Import
Laravel, MySQL, Laravel Excel, Redis Queues, Zoho CRM API

- Engineered an Excel-driven bulk-import pipeline that auto-maps product images by filename, enabling vendors to onboard 10,000+ SKUs per upload and cutting catalog setup time by ~90%.
-
- Delivered multi-vendor storefronts, inventory tracking, and a deals/discounts engine, with every customer inquiry synced to Zoho CRM for automated lead management.
-

Multi-Tenant Website Builder & Course Platform for Educators
Laravel, MySQL, Multi-Tenancy, RBAC, Zoho CRM API

- Built a multi-tenant SaaS that lets spiritual educators and astrologers launch a branded website with courses, products, and flexible pricing in minutes, without developer involvement.
-
- Implemented 5-tier role-based access control (Super Admin, Admin, Trainer, Institute, Student) and tenant-tagged Zoho CRM lead capture, eliminating manual lead entry.
-

EdTech Course Management Platform
Laravel, MySQL, Zoho CRM API, OAuth 2.0, JavaScript

- Delivered a role-based course marketplace where trainers and institutes self-publish courses, with real-time Zoho CRM lead sync that reduced inquiry response time by ~60%.
-

AI PROJECTS

PolicyPilot: RAG Copilot for Insurance Documents
Python, FastAPI, LangChain, OpenAI API, Ollama, ChromaDB, MongoDB | GitHub

- Built a Retrieval-Augmented Generation assistant that answers questions over insurance policy wordings with page-level citations, using hybrid search (BM25 + embeddings) and re-ranking to reach 90%+ answer accuracy on a 150-question evaluation set.
-
- Added a privacy mode running Llama 3 locally via Ollama so sensitive documents never leave the server; streamed responses in under 2 seconds via FastAPI.
-

LeadGenie: Autonomous CRM Lead-Qualification Agent
Python, LangGraph, OpenAI API (Function Calling), MCP, Playwright, Zoho CRM API | GitHub

- Designed a LangGraph multi-step agent that researches inbound leads on the web, scores fit and intent with schema-validated LLM outputs, and writes qualified leads back to Zoho CRM, reducing manual lead triage by ~75%.
-
- Exposed CRM, search, and browser tools through a Model Context Protocol (MCP) server with human-in-the-loop approvals and guardrails for safe autonomous actions.
-

ScrapeForge: AI-Powered Web Scraping & Data Extraction Engine
Python, Playwright, Selenium, BeautifulSoup, OpenAI API, MongoDB, FastAPI | GitHub

- Built a resilient scraping platform with headless Playwright, Selenium fallback, proxy rotation, and retry/backoff, monitoring 25,000+ product pages daily at a 98% success rate.
-
- Replaced brittle CSS selectors with LLM-based schema extraction (structured JSON outputs), cutting new-site onboarding from 2 days to under 1 hour.
-

EDUCATION

- **Master of Computer Applications (MCA)** | *2023 – Present*
- JAIN University, Rajasthan, India
-
- **Bachelor of Computer Applications (BCA)** | *2019 – 2021*
- Maharshi Dayanand Saraswati University (MDSU), Ajmer, India
-

CERTIFICATIONS & TRAINING

- **Full Stack Web Development Program** (6-month intensive: JavaScript, Node.js, PHP, Laravel, SQL)
- *Pepcoding Education (ODC) Pvt. Ltd.* | *Feb 2022 – Aug 2022*
-

ACHIEVEMENTS

- Delivered 50+ web projects and production modules across 5 industries: InsurTech, e-commerce, EdTech, hospitality, and real-time gaming.
-

- Automated up to 80% of manual data-entry and lead-handling work through bulk-import pipelines and Zoho CRM integrations.
-
- Grew from Junior Developer to Software Engineer across 4 companies in under 4 years, owning business-critical modules end to end.
-
- Built and open-sourced 4 AI and automation projects (RAG, AI agents, MCP, web scraping) with documented architecture and evaluations.
